

Noodles and Company

Every approved keto pick • net carbs as modified • say it exactly like the orange lines

Noodles & Company is challenging for strict keto because most entrées are built around noodles, mac, tortelloni, ramen, rice noodles, or bread. The safest orders are standalone grilled chicken, steak, shrimp, pulled pork, Lemon Parmesan Broccoli, Caesar Salad without croutons, or Chicken Caesar Salad without croutons. Some protein noodle bowls can work only if the restaurant can truly omit the noodles and sweet sauces, leaving the protein and vegetables.
