

Taco Bell

Every approved keto pick • net carbs as modified • say it exactly like the orange lines

Taco Bell can be made keto only by stripping away tortillas, taco shells, rice, beans, potatoes, chips, crunchy strips, and sugary drinks. The safest food orders are no-shell taco bowls, the Power Menu Bowl with no rice/beans, or meat-and-cheese fillings from burritos/quesadillas served in a bowl. Avoid combo boxes, nachos, Mexican Pizza, bean/rice/potato items, sweets, and Freeze drinks because they are too starch- or sugar-heavy.
