

# Chipotle Mexican Grill

Every approved keto pick • net carbs as modified • say it exactly like the orange lines

Chipotle can be very keto-friendly if you order bowls or salads and skip tortillas, taco shells, rice, beans, chips, and corn salsa. The best choices are meat-based bowls or salads with chicken, steak, barbacoa, or carnitas plus cheese, sour cream, queso, and/or guacamole. Avoid the sugary drinks, chips, and quesadilla because those are fundamentally high-carb items.
