

LongHorn Steakhouse

Every approved keto pick • net carbs as modified • say it exactly like the orange lines

LongHorn can be very keto-friendly if you focus on steaks, grilled seafood, grilled chicken, ribs without glaze, and non-starchy sides like broccoli, asparagus, mushrooms, creamed spinach, or salad. Skip the complimentary bread, potatoes, rice, fries, mac & cheese, desserts, and sweet drinks; keep sauces and dressings on the side. The safest keto order is a plain steak or grilled seafood entrée with asparagus or broccoli.
